Date of birth: 03.11.1987 (Regensburg)
Nationality: German · married, 2 children

PROFILE

DevOps engineer with 12+ years in IT, including 4 years in a mobile network operator's NOC doing Linux/Unix administration. Strong background in telecom infrastructure (OSS/BSS, 4G/5G core monitoring) combined with modern platform engineering: Kubernetes, GitOps, IaC and observability. Comfortable owning production for high-traffic systems (on-call lead, 99.95% SLA). I prefer boring, well-documented automation over heroics.

CORE SKILLS

Cloud & Container	AWS (EKS, EC2, RDS, IAM), Azure (AKS), OpenStack, Kubernetes, Helm, Docker, Istio
IaC & Config	Terraform, Terragrunt, Ansible, Packer, Crossplane
CI/CD	GitLab CI, Jenkins, Argo CD, Flux, GitHub Actions, Nexus, Harbor
Observability	Prometheus, Grafana, Loki, Thanos, ELK/OpenSearch, OpenTelemetry, PagerDuty
Programming	Bash, Python, Go (tooling), Groovy, SQL
Telecom / Network	SNMP, NETCONF, BGP/OSPF basics, Nokia NetAct, Ericsson ENM, 5G SA core (CNFs)
Security	Vault, Trivy, OPA/Gatekeeper, CIS hardening, ISO 27001 audits

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer (Team Lead Platform) | Nordwerk Digital GmbH, Munich **04/2021 – present**

Environment: AWS, EKS, Terraform, Argo CD, GitLab CI, Prometheus/Thanos, Vault

- Lead a platform team of 5 engineers serving ~60 developers across 9 product teams.
- Designed the internal developer platform (golden-path templates, self-service namespaces), cutting time-to-first-deploy for new services from 3 days to 40 minutes.
- Reduced AWS spend by 31% (EUR 420k/year) through rightsizing, Karpenter and spot instances.
- On-call lead; introduced blameless postmortems and SLO-based alerting (pager volume -58%).

Project “Halcyon” (2022–2023): migration of 140 microservices from a legacy VM farm (VMware + Puppet) to multi-account EKS with GitOps. Zero-downtime cutover using weighted DNS and traffic mirroring. Budget EUR 1.2M, delivered two weeks early.

DevOps Engineer | Telvana Mobile GmbH, Munich **01/2018 – 03/2021**

Environment: OpenStack, Kubernetes (on-prem), Jenkins, Ansible, ELK, Python

- Built CI/CD pipelines for the OSS/BSS software stack (billing mediation, provisioning, customer portal).
- Containerised 30+ legacy Java applications; release frequency went from quarterly to weekly.
- Automated network element backups (2,300 nodes) with Ansible + NETCONF, replacing manual scripts.

Project “5G Core CI Lab” (2020): automated test pipeline for cloud-native 5G core functions (AMF/SMF/UPF) from two vendors. Each vendor drop deployed to a lab cluster, smoke-tested with simulated UEs and reported in Grafana within 2 hours instead of 2 weeks.

Linux System Administrator / NOC Engineer (Level 2) | Telvana Mobile GmbH, Munich **10/2013 – 12/2017**

Environment: RHEL, Solaris, Nagios, Zabbix, Nokia NetAct, Oracle DB

- 24/7 shift work in the Network Operations Centre: incident handling for radio and core network alarms.
- Administered ~350 RHEL/Solaris servers hosting OSS systems; patching, backup and capacity planning.
- Wrote a Python alarm-correlation tool that reduced duplicate tickets by 45%; later adopted company-wide.

IT Specialist (Fachinformatiker Systemintegration) – apprenticeship & employment | Stadtwerke Regensburg, Regensburg **09/2006 – 08/2009**

Environment: Windows Server, Active Directory, Cisco switches

- First-level IT support for 600 employees; client rollout; network cabling and switch configuration.

EDUCATION

B.Sc. Computer Science (Informatik) – Hochschule München, 2009 – 2013 · Final grade 2.1

Thesis: “Automated anomaly detection in SNMP time series for mobile network elements” (written with Telvana Mobile)

IHK Certificate, Fachinformatiker für Systemintegration – Regensburg, 2009

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA), 2022 – Cert. ID LF-7hq2k9x31p
- HashiCorp Certified: Terraform Associate (003), 2023
- AWS Certified Solutions Architect – Professional, 2024 (valid until 2027)
- ITIL v4 Foundation, 2016

LANGUAGES

German (native) · English (business fluent, C1) · Czech (basic conversation)

OTHER

- Speaker at KubeCon EU 2024 (lightning talk: “GitOps for network functions – lessons from the trenches”)
- Maintainer of *snmp-exporter-profiles*, an open-source collection of Prometheus configs for telecom gear
- Driving licence classes B and A; volunteer firefighter (Freiwillige Feuerwehr Schwabing)

München, 14 September 2026
