Programme & Project Manager — Telecommunications Infrastructure and Enterprise IT

Executive Summary

I am a delivery-focused programme manager with sixteen years' experience in the telecommunications sector, having begun my career climbing masts as a radio-frequency field engineer before moving into planning, project management and, latterly, the direction of multi-million-pound network transformation programmes. My technical grounding allows me to hold credible conversations with engineers and vendors alike, while my commercial experience enables me to represent programmes confidently at board level.

Over the past decade I have delivered programmes with a combined value in excess of £140 million, including national 5G roll-out, the consolidation of two data centres, and the replacement of a legacy billing platform serving 3.2 million customers. I am at my best in complex, multi-vendor environments where governance must be rigorous but pragmatic, and I take particular pride in developing the project managers who work for me.

Career History

Albion Connect plc, London
Senior Programme Manager, Network Transformation | *June 2019 – Present*

Reporting to the Chief Technology Officer, I direct a portfolio of four programmes with a total budget of £78m and a delivery organisation of 11 project managers, 2 PMO analysts and approximately 140 internal and supplier staff.

- **Project Meridian (5G Standalone roll-out, £52m):** led the deployment of 1,850 5G SA sites across the South East and Midlands, coordinating two radio vendors, three civil-works contractors and landlord negotiations. Achieved 96% of the site target within the regulatory coverage deadline agreed with Ofcom and 4% under budget.
- **Project Keystone (Data-centre consolidation, £18m):** migrated 2,400 virtual machines and 60 network functions from the Slough facility into two Tier III sites, with no customer-affecting outage over a 14-month migration window.
- Introduced a hybrid delivery framework (PRINCE2 stage gates with SAFe for software teams) now adopted as company standard.
- Chair of the Technology Change Advisory Board; mentor to five junior project managers, three of whom have since been promoted.

Brightwave Telecom Ltd, Reading
IT Project Manager, then Senior Project Manager | *March 2013 – May 2019*

Joined to manage infrastructure projects within the IT function and was promoted in 2016 to lead the company's largest-ever IT programme.

- **Project Ledger (BSS/billing replacement, £24m):** managed the replacement of a 20-year-old in-house billing system with a commercial off-the-shelf platform for 3.2 million consumer and SME accounts. Responsible for vendor selection, data migration strategy (five dress rehearsals) and a phased cut-over. Delivered three months late owing to a vendor insolvency, which I managed through a novation to an alternative supplier without additional cost to the business.
- Delivered the Windows 10 and Office 365 migration for 2,100 staff across 14 sites.
- Established the IT PMO, including RAID reporting, benefits tracking and a project-manager competency framework.

Brightwave Telecom Ltd, Reading
Radio Network Planning Engineer | *September 2010 – February 2013*

Produced coverage predictions and site designs for 3G/4G infill sites using Asset and Atoll, and acted as technical lead on site-acquisition projects in the Thames Valley. It was here that I discovered that I enjoyed coordinating the work rather more than modelling it.

Kestrel Mobile Services (contractor to several UK operators)
RF Field Engineer | *July 2008 – August 2010*
Commissioning, drive-testing and optimisation of 2G/3G base stations. Holder of a working-at-height and rope-access certificate; responsible for health and safety briefings for field teams of up to eight engineers.

Education and Professional Qualifications

2022 SAFe 6 Agilist; Certified ScrumMaster (Scrum Alliance)
2018 Project Management Professional (PMP), PMI — Certificate No. 2284719
2014 PRINCE2 Practitioner; 2021 Managing Successful Programmes (MSP) Foundation
2012 MSc Telecommunications Engineering (Distinction) — University of Surrey (part-time)
2008 BSc (Hons) Electronic Engineering, 2:1 — University College Cork, Ireland

Professional Affiliations

Fellow of the Association for Project Management (FAPM); Member of the Institution of Engineering and Technology (MIET); volunteer STEM Ambassador delivering talks to secondary-school students in East London.

Personal Interests

Open-water swimming (completed the Windermere one-mile in 2025), Irish traditional music (fiddle), and restoring vintage shortwave radios.
